Election/Restrictions

1. A telephone message was provided to Mr. Patrick Zhang, Applicant's Representative on February 12, 2004, to request an oral election to the following restriction requirement. On February 18, 2004, when a return call was made by Mr. Zhang, and during the course of the Examiner's identification of restrictable species in the invention, Mr. Zhang indicated preference to receiving the restriction requirements in a letter so that he can more clearly discuss the matter with the inventor.

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

- A: Wherein storing energy is by charging at least one capacitor (e.g., see claims 3 and 14).
- B: Wherein storing energy is by charging a rechargeable battery (e.g., see claims 4 and 15).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic to the method claims and claim 12 is generic to the apparatus claims.

3. Upon election of one of the embodiments identified above as A and B, applicant is further required under 35 U.S.C. 121 to elect one of the following species of sensing the motor rotational speed for prosecution on the merits to which the claims shall be

Art Unit: 3641

restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic to the method claims and claim 12 is generic to the apparatus claims.

- C: Wherein sensing the motor rotational speed is by measuring the frequency of a Hall effect signal (e.g., see claims 8 and 19).
- D: Wherein sensing the motor rotational speed is by measuring the back emf of the motor (e.g., see claims 9 and 20).

4. Upon election of one of the embodiments identified above as A and B, applicant is further required under 35 U.S.C. 121 to elect one of the following species of reducing the first current for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic to the method claims and claim 12 is generic to the apparatus claims.

- E: Wherein reducing the first current is by reducing the voltage supplied to the motor (e.g., see claims 10 and 21).
- F: Wherein reducing the first current is by pulse width modulating a power signal to the motor (e.g., see claims 11 and 22).

5. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 3641

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rick Palabrica whose telephone number is 703-306-5756. The examiner can normally be reached on 7:00-4:30, Mon-Fri; 1st Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Carone can be reached on 703-306-4198. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
